AMENDMENTS TO THE ABSTRACT

Please amend the Abstract as follows:

DISTRIBUTED POWER GENERATION PLANT AUTOMATED EVENT ASSESSMENT AND MITIGATION PLAN DETERMINATION PROCESS

ABSTRACT OF THE DISCLOSURE

A system is disclosed for detecting predefined events occurring in operating power generation equipment at a customer location and for diagnosing and responding to the predefined events. The system includes a plurality of sensors ~~at the customer location for monitoring the power generation equipment and for~~ collecting operating data from the ~~power generation~~ equipment, a monitor at the customer location for analyzing the operating data ~~collected from the power generation equipment and for~~ determining if any of the predefined events occurred, ~~during operation of the equipment~~, a management system at another location ~~different from the customer location~~ for storing and retrieving historical operating and event data ~~pertaining to the operation of~~ for fleet power generation equipment, ~~and to the occurrence of the predefined events in the fleet power generation equipment~~, an analysis platform for analyzing whether any predefined events have occurred, ~~the analysis platform including a first program resident in the monitor and~~
